

What Is G5-CIAS?

The **G5-CIAS Self-Charging Vial** is a groundbreaking advancement in vibrational wellness, developed through extensive research at the Goyetche Institute and Dr. Tim Goyetche/ CIAS is — engineered to convert harmful electromagnetic fields (EMFs) into restorative healing energy at a deep cellular level.

This innovative formula blends:

- Negatively charged calcium iodide
- Sarcodes of ATP and ADP (cellular energy molecules)
- Trace elements of copper and iron

Adenosine Triphosphate (ATP), energy-carrying molecule found in the cells of all living things. ATP captures chemical energy obtained from the breakdown of food molecules and releases it to fuel other cellular processes.

Adenosine Diphosphate (ADP) a naturally occurring compound in living cells & plays a key role in cellular energy transfer.

How It Works

CIAS G5 is designed to be placed in a **glass vial, silicone casing, heat shrink tubing, or BPA-free plastic bag**, then applied directly to the skin. This method allows the vial to interact with the body's biofield, transforming disruptive EMFs from:

Wi-Fi

Bluetooth

Cellular radiation (3G, 4G, 5G)

...into **healing frequencies** that support cellular repair, pain reduction, and energetic alignment.

Note: G5 is not digestible and should not be in prolonged contact with metal, as it is energetically unstable.

Proven Results: The Goyetche Institute has conducted extensive testing on G5-CIAS, with astonishing outcomes:

- **Pain relief** in severe cases, including **trigeminal neuralgia** and **broken bones**
 - *One patient had a vial taped to a broken foot and could slam it on the floor pain-free the next day!*
- **Increased physical strength and endurance** *Tests show strength gains between 30-100%*
- **Rapid wound healing** *Open wounds healed in just 1–2 days*
- **Tumor regression in pets** *Mast cell tumors disappeared within 48 hours*
- **Reversal of serious conditions**
 - *Testicular cancer, blocked arteries, enlarged heart, and melanoma have all shown dramatic improvement*

These results speak to the vial's ability to support the body's natural healing intelligence—without invasive procedures or pharmaceuticals.
